RE: Update – Type 9 and 10 Window Kit
DATE: May 13, 2009

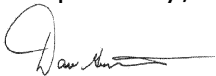

Dear Valued Customer:

On March 2, 2009 CURRIES began accepting orders for the Type 9 and 10 Window Kits. Since that time, the CURRIES Order Processing Department has been questioning any door order that does not specify the type of window kit required. Sales Bulletin #285 instructed distributors that if a window kit was not specified on the order, CURRIES would default to the new Type 9 and 10 Kits.

Effective Monday, June 1, the CURRIES Order Processing Department will no longer question which type of window kit is required. The Type 9 and 10 Kit will be the default kit unless specified in the "Special Instructions". CURRIES strongly encourages all distributors to begin using and stocking the Type 9 and 10 Kit.

If you have any questions, please contact your CURRIES Customer Service Professional.

Respectfully,

Dave Goetzinger
Marketing Manager
