Sidelight Installation Made Easy

A common problem with the installation of a sidelight opening in buildings is transporting the complete frame unit to the opening. CURRIES is pleased to announce the CURRIES KD SideLight. This is a drywall sidelight unit that can be assembled and installed at the opening without having to weld the frame pieces together and transport them to various levels of a building. There are no more concerns of fitting the welded frame in the elevator or through doorways of a building. The CURRIES KD SideLight is designed to use common hand tools for installation in a matter of minutes in a rough opening. The complete frame bundle can be carried to the specified opening and installed in a very short time, saving both labor and transportation cost.

The CURRIES KD SideLight Frame is also available in any of the CURRIES factory painted prefinish colors along with any of the pantone colors.

See how easy it is to install the CURRIES KD sideLight frame, visit the CURRIES website at www.curries.com and view a quick installation video.
