Tornado

## *More Windstorm Solutions Available from CURRIES*

In areas subject to extreme wind events, building owners, school and hospital administrators, neighborhood associations, and others responsible for public safety are looking at safe rooms to protect occupants.

The StormPro multi-point lock, when used with CURRIES tornado resistant doors and frames, results in an opening that's suitable for daily use and meets the tough requirements of FEMA safe rooms.

The CURRIES StormPro multi-point lock option is certified through Underwriters Laboratories to FEMA 361 and 320 test standards. The complete assembly is fire rated through 3 hours; the certification label is attached.

The StormPro multi-point lock option is available with the preassembled ReadySet® system.
