RE: StormPro Tornado Resistant Assembly Expansions  
DATE: January 10<sup>th</sup>, 2018

CURRIES is pleased to announce expansions in the StormPro tornado resistant assembly product offering. These expansions include, new StormPro shutter sizes including pairs and optional accessories, StormPro multi-point assembly 4 sided frame option and smaller StormPro 320 opening size availability. Please see below information for more details.

### **StormPro Shutter Assembly**

- New opening sizes including pairs:
  - Pair opening sizes 5'0" x 4' 0" to 8'0" x 6'8"
    - Corbin Russwin FE6700 Series with 988CR Series manual surface bolts
    - SARGENT FM6100 Series shutter hardware with 988 Series manual surface bolts
  - Smaller single opening size 2'6" x 3' 0" to 4'0" x 6'8"
- New approved optional accessories for StormPro shutters including Rockwood 491S and 494S mechanical door holders plus Rockwood 620 and 622 door viewers

### **StormPro Multi-point Assembly**

- 4 Sided frames now available for Corbin Russwin FE6600 Series and SARGENT FE7300 Series Multi-point Assemblies singles and pairs
- Reminder:
  - Corbin Russwin FE6600 and Sargent FM7300 concealed vertical rods, top / bottom bolts, and mortise lock body cassettes are only available as factory installed in a Curries StormPro Door. Current ordering process does not change: Doors and frames are ordered through the door brands and hardware is ordered through the hardware brands. The door price includes cost of hardware component installation. The mortise lock body, trim, levers, and all other hardware components are shipped directly from Sargent or Corbin Russwin and must be field installed by a factory trained installer
  - Important: Do not remove any hardware blocking or filler plates in the door or the frame until the mortise lock is ready to be installed

### **StormPro 320 Assembly**

- New smaller opening size 2'8" x 6'8" to 3'0" x 7'0"

All StormPro assemblies meet FEMA P320 (2014) and P361 (2015) guidelines and are third-party classified through Underwriters Laboratories to ICC 500 (2014). StormPro tornado resistant assemblies come with the certification label attached.

New technical documents are available on the CURRIES website [www.curries.com](http://www.curries.com). Pricing for this is on the Partner Area of the CURRIES website and CRCdash.

If you have any questions, please contact your CURRIES Customer Service Professional or your local ASSA ABLOY Door Security Solutions Representative.
